

**Table 6. Health insurance coverage of the civilian noninstitutionalized population: For the privately insured, non-elderly<sup>a</sup> population, policies for individual (non-group)<sup>b</sup> health insurance, total number, and mean, median premium cost, United States, 2004**

Individual (Non-group) Health Insurance Policies	Policyholders <sup>c</sup> (millions)	Mean premium cost (dollars)	Median premium cost (dollars)
All Policyholders	5.908	3,493	2,561
Single Policyholders	3.850	2,736	1,933
Family Policyholders	2.057	4,910	4,265

**Table F. Health insurance coverage of the civilian noninstitutionalized population: Standard errors for the privately insured, non-elderly<sup>a</sup> population, policies for individual (non-group)<sup>b</sup> health insurance, total number, and mean, median premium cost, United States, 2004**

Individual (Non-group) Health Insurance Policies	Policyholders <sup>c</sup> (millions)	Mean premium cost (dollars)	Median premium cost (dollars)
All Policyholders	0.365	212	153
Single Policyholders	0.261	213	173
Family Policyholders	0.232	403	253

<sup>a</sup>Policyholder age: 0-64

<sup>b</sup>Individual (non-group) health insurance is coverage that is purchased directly from health insurers, rather than coverage through a group (e.g., employer based insurance).

<sup>c</sup>The table above reports policies for all policyholders as of the beginning of the year; however, as a small number of people hold multiple policies, the unique number of policyholders is slightly lower.
