

Table 6. Health insurance coverage of the civilian noninstitutionalized population: For the privately insured, non-elderly^a population, policies for individual (non-group)^b health insurance, total number, and mean, median premium cost, United States, 2006

Individual (Non-group) Health Insurance Policies	Policyholders^c (millions)	Mean premium cost (dollars)	Median premium cost (dollars)
All Policyholders	5.610	3,801	3,006
Single Policyholders	4.036	2,882	2,282
Family Policyholders	1.574	6,160	5,412

Table F. Health insurance coverage of the civilian noninstitutionalized population: Standard errors for the privately insured, non-elderly^a population, policies for individual (non-group)^b health insurance, total number, and mean, median premium cost, United States, 2006

Individual (Non-group) Health Insurance Policies	Policyholders^c (millions)	Mean premium cost (dollars)	Median premium cost (dollars)
All Policyholders	0.359	187	156
Single Policyholders	0.306	175	176
Family Policyholders	0.166	338	350

^aPolicyholder age: 0-64

^bIndividual (non-group) health insurance is coverage that is purchased directly from health insurers, rather than coverage through a group (e.g., employer based insurance).

^cThe table above reports policies for all policyholders as of the beginning of the year; however, as a small number of people hold multiple policies, the unique number of policyholders is slightly lower.
